How to Configure the AP Mode on the EX1200M

It is suitable for : **EX1200M**

Application introduction:

To set up a Wi-Fi network from an existing wired (Ethernet) network so that multiple devices can share the Internet.
Here takes EX1200M as demonstration.
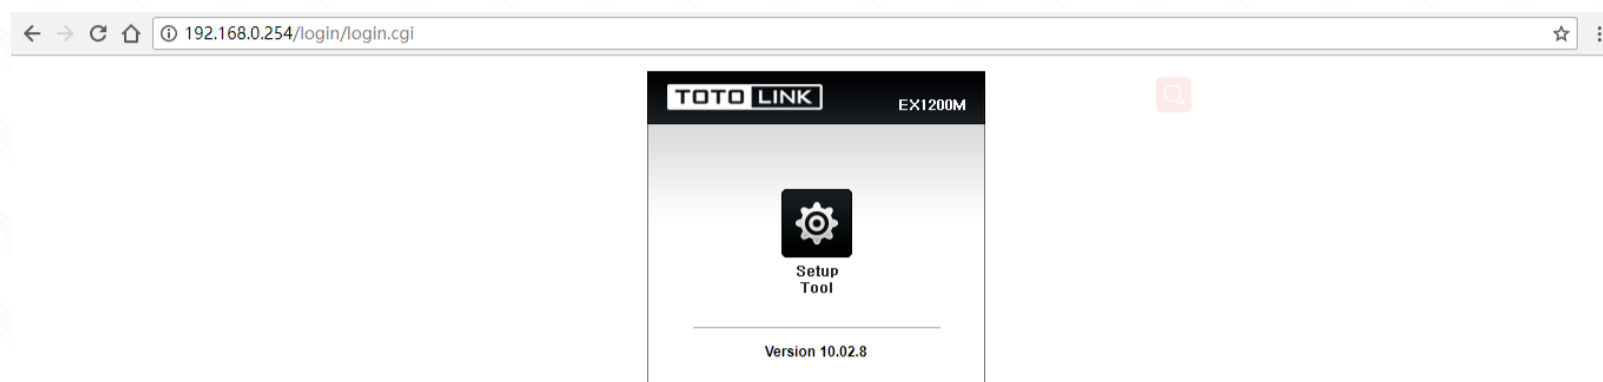

Set up steps

STEP-1 : Configure the extension

※ Please reset the extender first by pressing the reset button/hole on the extender.

※ Connect your computer to the extender wireless network.

Note:

1.The default Wi-Fi Name and Password are printed on the Wi-Fi Info Card to connect to theextender.

2.Do not connect the extender to the wired network until the AP mode is set.

STEP-2 : Login to the management page

Open the browser, clear the address bar, enter **192.168.0.254** to the management page, Then check **Setup Tool.**

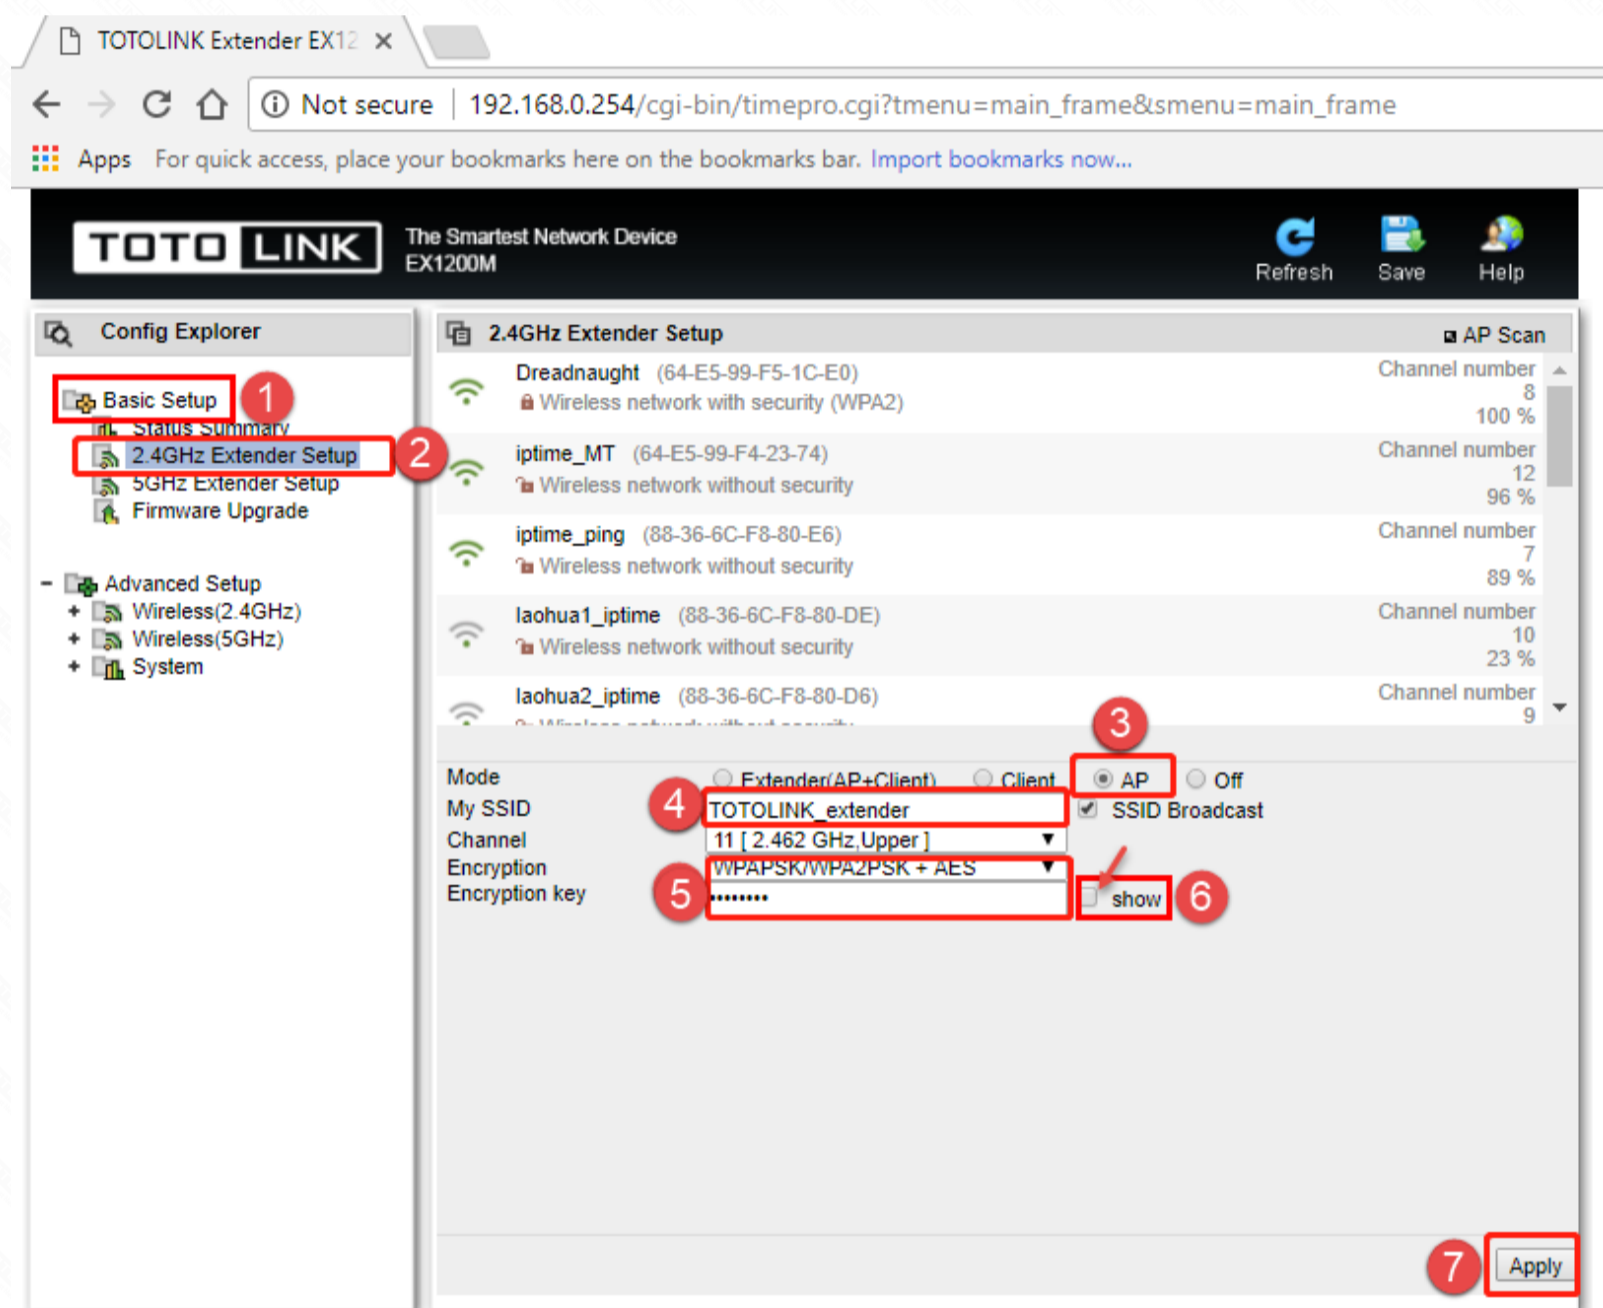

STEP-3 : AP mode setting

AP mode supports both 2.4G and 5G. The following describes how to set up 2.4G first, then set 5G:
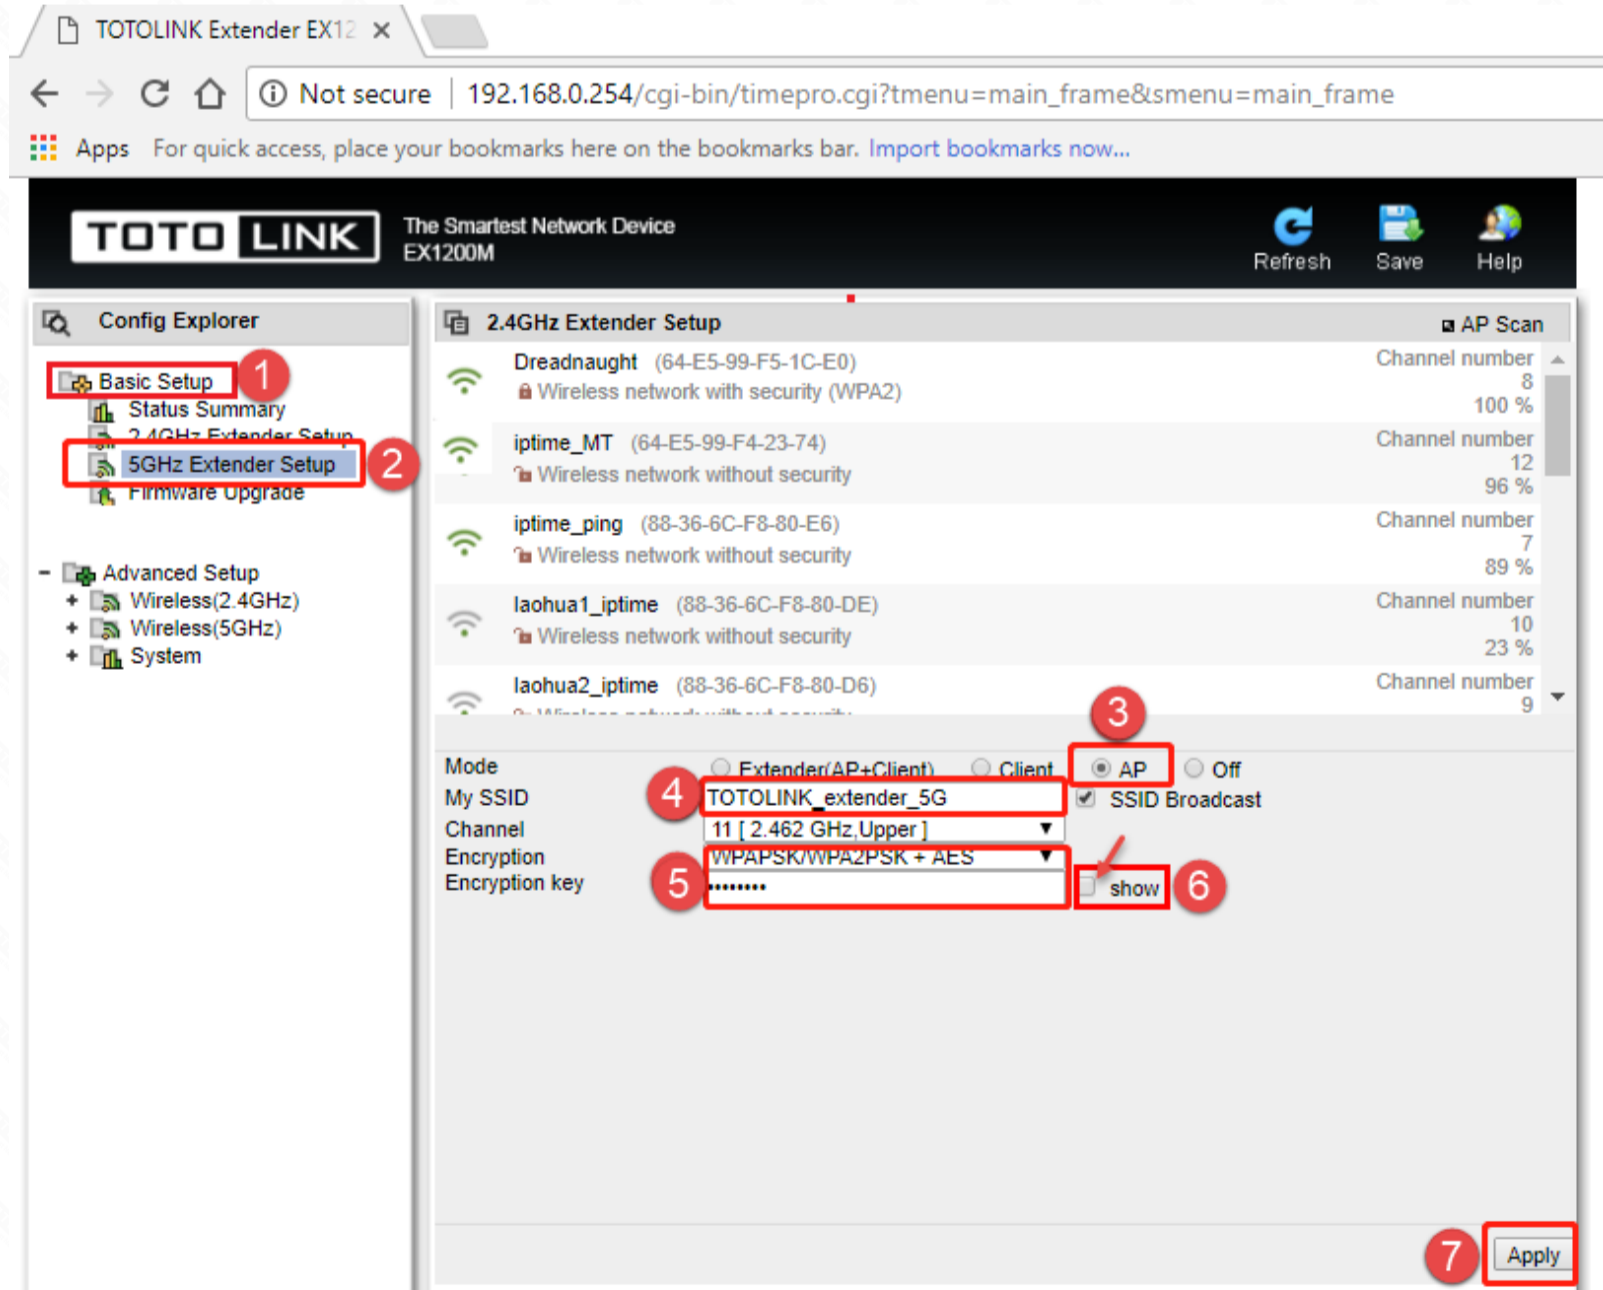

3-1. 2.4GHz Extender Setup

Click ❶ **Basic Setup,** -> ❷ **2.4GHz Extender Setup**->Select ❸ **AP mode,** ❹ setting the **SSID** ❺ setting **password**, If you need to see the password, ❻ check **Show,** Finally ❼ click **Apply**.

After the setup is successful, the wireless will be interrupted and you need to reconnect to the Extender's wireless SSID.

3-2. 5GHz Extender Setup

Click ❶ **Basic Setup,** -> ❷ **2.4GHz Extender Setup**->Select ❸ **AP mode,** ❹ setting the **SSID** ❺ setting **password**, If you need to see the password, ❻ check **Show,** Finally ❼ click **Apply**

STEP-4 :

Connect the extender to the wired network through the network cable as shown below.

STEP-5 :

Congratulations! Now all your Wi-Fi enabled devices can connect to the customized wireless network.
