

How to set up DDNS on TOTOLINK Router?

It is suitable for: N600R, A800R, A810R, A3100R, T10, A950RG, A3000RU

Application introduction:

DDNS (Dynamic Domain Name System) is useful for your own website, FTP server or other server behind the router.

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

$\left(\leftrightarrow ightarrow$ C' \textcircled{a}	Q 192.168.0.1 →

Note: The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

USER LOGIN

Forget Password?

STEP-3:

Enter the Advanced Setup page of the router, Click Managemet->DDNS on the navigation bar on the left.

₽	System Status	^

₿ \$	Firewall Management Administrator Setting Time Setting DDNS Remote Management	

STEP-4:

Enter the Service Provider, Domain Name, User Name and Password in the blank space, and then click Apply to apply the modification.

DDNS

Dynamic DNS is a service, that provides you with a valid, unchanging, internet domain name (an URL) to go with that (possibly everchanging) IP-address.
