

# How to use the router's WPS button?

It is suitable for : All TOTOLINK router

### **Application introduction:**

This article describes how to quickly make a wireless connection through the router's WPS button.

## Set up steps

#### STEP-1:

- Please make sure your router has WPS button before setting.
- Please make sure your wireless client supports WPS functionality before setting.

#### STEP-2:

Press WPS button on the router for 1s, WPS enabled. There are two types of wireless router WPS buttons: RST/WPS button and WPS button. As shown below.

2-1. RST/WPS button:

#### Note:

If router is a RST/WPS button, no more than 5s, router will be reset to factory defaults if you press it for more than 5s.

#### STEP-3:

After pressing the WPS button, use wireless client to connect to the router WIFI signal. Using Computer and Mobile phone wireless connection as an example. As shown below.

3-1. Computer wireless connection:
